DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-91, drawn to screening of drugs, classified in class 436, subclass 501.
 - II. Claims 92-97, drawn to method for effecting cellular response, classified in class 435, subclass 69.1+.
 - III. Claims 98-115, drawn to method of treating a disease, classified in class 604, subclass 19+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions of screening of drugs of Group I are not disclosed as capable of use together with method of affecting cellular response of Group II. Screening of drugs of Group I have different modes of operation, different functions, or different effects than method of affecting cellular response of Group II.
3. Inventions of Group I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case,

Art Unit:

the different inventions of screening of drugs of Group I are not disclosed as capable of use together with method of treating disease of Group III . Screening of drugs of Group I have different modes of operation, different functions, or different effects than method of treating disease of Group III.

4. Inventions of Group II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions of method of affecting cellular response of Group II are not disclosed as capable of use together with method of treating disease of Group III . Method of affecting cellular response of Group II have different modes of operation, different functions, or different effects than method of treating disease of Group III.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Doreen Trujillo (215-568-3100) on March 23, 2001, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit:

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arun Chakrabarti, Ph.D. whose telephone number is (703) 306-5818. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, W. Gary Jones, can be reached on (703) 308-1152).
